

“Sander recently joined Wärtsilä after 15 years at sea as a dual licenced officer in the merchant segment where he were involved in Marine Engineering & Navigation. Going shoreside, Sander has held positions for several years as project manager and instructor in the Simulation Training world.

Sander has now taken the role as Product Sales Manager, Technological Simulators at Wärtsilä, making sure to bring the technical simulator products and their new technologies to the market, whilst driving decarbonization and digitalization in education.

Sander holds a Master Mariner & Marine Engineering license and is a graduate of the Maritime Academy De Ruyter from Vlissingen, The Netherlands.“

WÄRTSILÄ

Sander Klaasse

Master Mariner & Marine Engineer with capacity of efficient decision making, driving change and developments for the future maritime generations to come.

- Digitalization, Decarbonization & Education.
- Contributing to simulation as predictive tool through R&D.
- Implementing new fuel & decarb technologies and solutions.
- Nautical & Technical operations and innovation.
- Supporting Industrial Revolution and technical innovations.
- Develop support systems for better decisions making.
- Applying bow -tie Risk Assessments methodology.
- Providing effective communication and didactical skills to perform in the modern technological maritime environment.
- Specialized in Maritime Simulator Training.
- Identifying Human, Technical & Organizational breakdown on maritime challenges & solutions.
- Marine Engineering (Dry dockings & refits)
- Maintenance | Fuel saving, Energy Transition & Waste Heat Recovery Systems, compliance, safety, security and environmental procedures (ISM) and Polar expedition operations (COP).

Product Sales Manager (Techsim)
Wärtsilä Voyage, Europe

Bio of Sander Klaasse:

Name: Sander Klaasse
Function: Product Sales Manager (TechSim)
Department: Global Simulation & Training
Devison: Wartsila - Voyage Services

Education: Maritime Officer - Deck & Engine
Titles: Marine Engineer & Master Mariner
Industries: Maritime Shipping/
Maritime Simulation & Training

Experience: 15 years seagoing / 5 years shoreside
Segments: Container/Cruise/Simulation & Training
Companies: P&O Nedlloyd/ Maersk Line/
Carnival Corporation/ Simwave/
Wärtsilä

Broadly experienced Maritime Professional within maritime industry with extensive global experience.

Master Mariner & Marine Engineer with capacity of efficient decision making, driving change and developments for the future maritime generations to come.

- Market overview & movement on Future Fuels & new Technologies.
- Digitalization, Decarbonization & Education.
- Contributing to simulation as predictive tool through R&D.
- Implementing new fuel & decarb technologies and solutions.
- Nautical & Technical operations and innovation.
- Supporting Industrial Revolution and technical innovations.
- Develop support systems for better decisions making.
- Applying bow-tie Risk Assessments methodology.
- Specialised in Maritime Simulator Training.
- Providing effective communication and didactical skills to perform in the modern technological maritime environment.
- Identifying Human, Technical & Organizational breakdown on maritime challenges & solutions.
- Marine Engineering (Dry dockings & refits)
- Maintenance | Fuel saving, Energy Transition & Waste Heat Recovery Systems, compliance, safety, security and environmental procedures (ISM) and Polar expedition operations (COP).
