

Zoran Kunkera

After over 20 years of international experience in the maritime sector, primarily in the shipbuilding industry in leading and executive positions at shipyards, including one of the largest nautical centres in Croatia, Zoran Kunkera is finalizing his doctoral study at the Faculty of Mechanical Engineering and Naval Architecture (FAMENA) at the University of Zagreb, where he also graduated, obtaining his Master Engineer of Mechanical Engineering title. His doctoral thesis relates to transforming traditional shipbuilding processes into smart ones through applying digital lean management. In his professional career, Mr. Kunkera, among others, managed several construction or repair projects of various types of ships, as well as a mega-yacht marina complex project. Among others, Mr. Kunkera was also a member of the Croatian Business Leaders Forum and, as of 2019, a member of the Economic Council by FAMENA.
